HOW TO

- Heading to cooler climes this season? Keep yourself warm with a few smart layering options.
- The trick to layering smartly (and packing lightly) is picking solid statement pieces that are easy to mix and match. For example, a classic white sweater and denim jeans are the ideal base for winter outfits. You could pair it with a sleeveless puffer jacket and winter cap for a coffee run or throw on a long winter coat and scarf for a business meeting.

- Layers are good but make sure you don't over-accessorise. If you've got a turtleneck on under a fitted, buttoned-up jacket, ditch the scarf and opt for some gloves instead. Think of all non-essential layers (scarves, gloves, vests) like accessories instead of necessities and you'll win the style game.
