### HOW TO

- When it comes to blue, there are a variety of shades. It's best to pair darker blues with darker pants such as brown and black and lighter colours with pants in white, beige and even khaki.
- Blue on blue works well, as long as it's not the same

material or colour. But the rule of thumb is that if you're wearing a blue shirt, make sure your trousers are at least two-three shades darker. Jeans are an exception.

- A printed or textured blue shirt should be worn without a tie so that there is no fighting for attention.
